UTC Aerospace Systems is the manufacturer of Goodrich pneumatic de-icing boots. Our patented FASTboot adhesive system saves you time and improves aircraft readiness.

Proven
Goodrich invented and continues to innovate de-icing technology — for more than 80 years.

Goodrich FASTboot® Pneumatic De-Icers

UTC Aerospace Systems is the manufacturer of Goodrich pneumatic de-icing boots. Our patented FASTboot adhesive system saves you time and improves aircraft readiness.

Goodrich FASTboot pneumatic de-icers take the guess work out of de-icer installation. The pre-applied adhesive provides a smooth and consistent de-icer bond at a fraction of the time needed for application of standard de-icers. Simply add the primer to the clean leading edge surface and allow a five-minute dry time. Following the approved installation procedure, peel and stick the pneumatic de-icer to the leading edge of your aircraft.

Features & Benefits
- Reduces installation time
- FASTboot de-icers can be flown immediately
- De-icers can be inflated two hours after installation
- Reduces hazardous waste through pre-applied adhesive
- Reduces risk through initial installation guarantee
